

Green Week

April 24-28

## Innovation

*"Innovation is the creation of the new or the re-arranging of the old in a new way." -Michael Vance (Disney)*

Throughout Green Week, students will explore how thinking creatively can change something old into something new. They will learn about innovators and will stretch their imaginations.

### Special Activities

- Use strips of recycled material to create bird nest feeders, animal toys for a local shelter and/or weave trivets and rugs.
- Learn about environmental innovators.
- Create new story characters and poems using recycled paper.

### Techsploration Assembly

Demonstrate the basic principles and history of transportation and flight. Grades 3-5 will participate in meg-lev workshops.

### Cozy Food Wraps

WPS Environmental Club will distribute Cozy Food Wraps to every student. The Environmental Club chose this project to help reduce the amount of waste from lunch packaging.

Other innovative related activities will be highlighted through music and physical education. Special thanks to Sue Ubaldi, Cherise Hutchings, Anne Low, Shawna Godshalk and all the volunteers who helped organize the events for the week. Please contact [cherisehutchings@gmail.com](mailto:cherisehutchings@gmail.com) if you would like to volunteer your time.
